iPhone - Convert Imei/Serial to IMEI/Serial for Non-jailbroken. iPhone - Convert Imei/Serial to IMEI/Serial for Non-jailbroken. Aug 12, 2015 I have forgotten my Apple user name or password. How to reset the password. How can I do this? pls help me out.. I wish to download movies and TV Shows for free. What sites are available and they do have all the new movies and shows? please help, thanks . Make my portable phone use sim card from my laptop. I have 2 mobile phones that i would like to use on my laptop. is there a way i can somehow clone my sims and retain the current usage. My sims are to new and i have none. . What is the serial number on an Apple Watch? Searching for the IMEI number of an Apple Device. SmartMobi IMEI's or smart card numbers. Convert IMEI into Product Identification. Do I have to do this? I would have to get a replacement for the phone. It says I have a Samsung Galaxy Ace. . How can I find my mobile phone IMEI number (Samsung Galaxy Ace) online?. How can I find my mobile phone IMEI number (Samsung Galaxy Ace) online? Get IMEI, Serial Number Online. Get IMEI, Serial Number Online.Q: How to pass index with ngFor? In my application I have tabular data and need to display data in different way. Date {{ task[i].date }} index is from 1 to N (number of objects). I want to show it vertically (for each date as a separate column) but I'm getting empty values. Where am I wrong? A: ng-container matColumnDef="date" should be ng-container matColumnDef="date[i]" instead of ng-container matColumnDef="date"

A: See this link This site is an imei to serial number converter, try out with your imei code and than choose other things like sim card Q: How to call a class in angularjs I'm trying to learn angularjs and went through a tutorial on udemy. After that I wrote the below code: var app = angular.module('myApp', []); app.controller('MainCtrl', function(\$scope) { \$scope.sidebar = 'Hello World!'; \$scope.message = 'Hello #1!'; }); Is it bad to call a class like this in angularjs when the module is already declared? I have seen many other examples where the class is used outside of a module and it seems to work fine. A: Its not wrong to call class as long as the class do not need to be added as a controller. If you want to use that class then you need to declare the module. var app = angular.module('myApp', []); app.controller('MainCtrl', function(\$scope) { \$scope.sidebar = 'Hello World!'; \$scope.message = 'Hello #1!'; }); app.factory('ApiService', function(){ var serviceObj = {}; return serviceObj; }); var a = new ApiService(); app.controller('mainCtrl', function(\$scope){ console.log(a); }); {{ sidebar }} {{ message }} This is called a Toyota Model 3. A story on by Mashable. The Japanese manufacturer wants to provide a cheap and accessible electric vehicle. The show car on display at the show gives us a look inside the design, ba244e880a
